## PICKING FINGERS

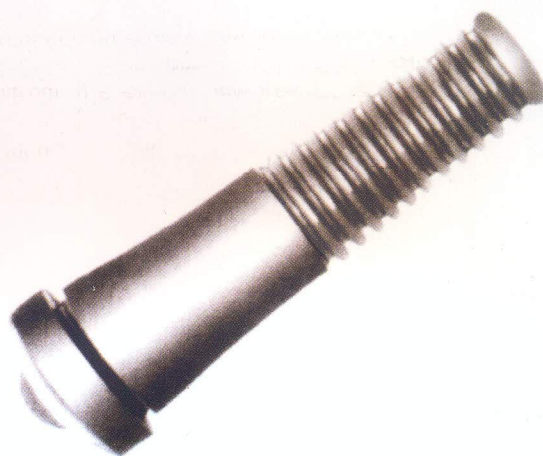

## LINO

**LINO** – a round finger. Its special design and delicate ribs ensure maximum flexibility and excellent picking results, without damage to the bird's skin. The special qualities of the hard compound – LINO M-110 – guarantee extra-long durability of the finger and make it especially suitable for picking turkeys. The soft compound LINO M-60 and soft medium LINO M-70 are more flexible and are used for picking broilers and hens. For particularly gentle jobs or very sensitive skin we offer a very soft compound – LINO M-45. **LINO** fits LINCO, MEYN and SYSTEMATE pickers and is available in various hardness degrees and many colors.

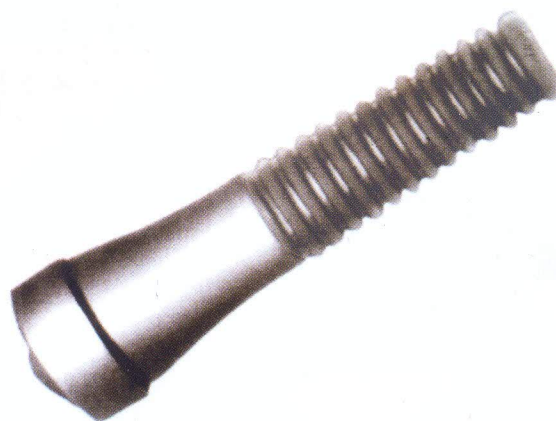

## KOP

**KOP** – a semi-oval shaped finger with a reinforced head to provide longer durability. A special body and rib design ensures excellent picking results without any skin damage. Perfect for processors of fresh production and for "yellow birds". **KOP** fingers are produced in different hardness degrees and colors to fit any requirement, from very soft KOP M-45 for the most delicate jobs to the hardest KOP M-140 for heavy duty jobs. For broilers the most popular hardness is KOP M-60 (soft), KOP M-70 (soft medium) and KOP M-90 (medium). **KOP** fingers fit STORK and MEYN pickers.

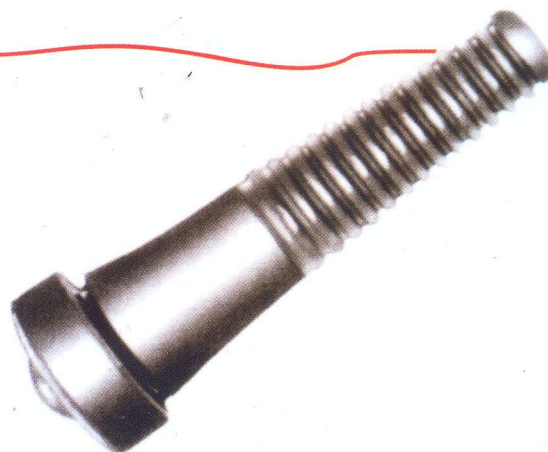

## ORNA

**ORNA** – its oval shape and thin profile give it more flexibility and a gentle contact with the birds' skin, thus making it excellent for processing plants which require a softer touch. Thanks to its special head design it sits tightly in the disc-hole which means longer finger durability. **ORNA** is excellent for fresh picking and "yellow birds". **ORNA** fits MEYN, STORK and LINCO pickers and is available in all hardness degrees and colors. The most popular compound for broilers is ORNA M-60 (soft), ORNA M-70 (soft medium) and ORNA M-90 (medium).

## GINA

**GINA** – a round finger with a special profile. **GINA** fits especially STORK and MEYN pickers. The combination of a round gentle finger profile and a special rib design gives this finger an excellent picking capacity. The shape of the head and neck enables a strong and stable hold of the finger in the disc-hole, which makes it last longer. **GINA** is produced in all hardness degrees, ranging from very soft M-45 to very hard M-140, to fit the requirements of each and every plant.

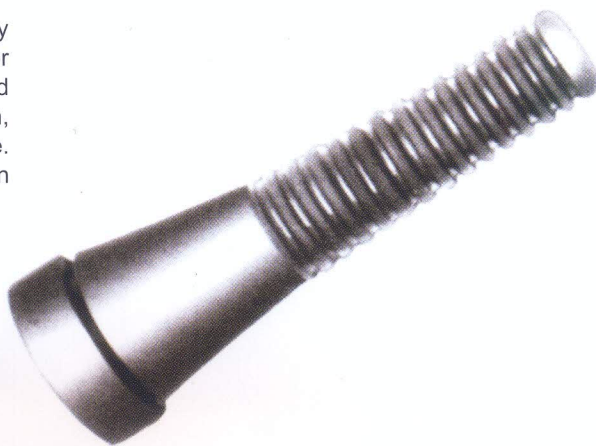

## DUROTY

**DUROTY** – an oval-shaped finger, designed to last longer, with an excellent picking performance. Available in black, yellow or any other color required. **DUROTY** is offered in all hardness degrees, ranging from very soft to very hard. Soft yellow **DUROTY** fingers are the most popular as they give excellent picking results. **DUROTY** fits JOHNSON, GAINESVILLE, GORDEX and BARKER pickers.

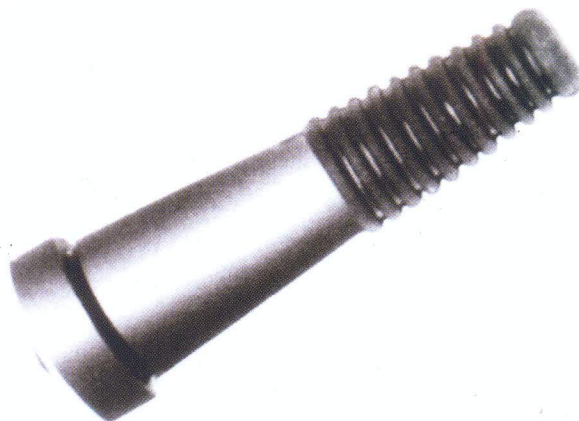

## MIKA

**MIKA** – a round, uniquely designed finger, developed by DURAM especially for users of JOHNSON, GORDEX or similar equipment who require a round finger. Its round and gentle ribs enable delicate contact with the bird's skin, which ensures very good picking without skin damage. **MIKA** is available in all hardness degrees and also in various colors.

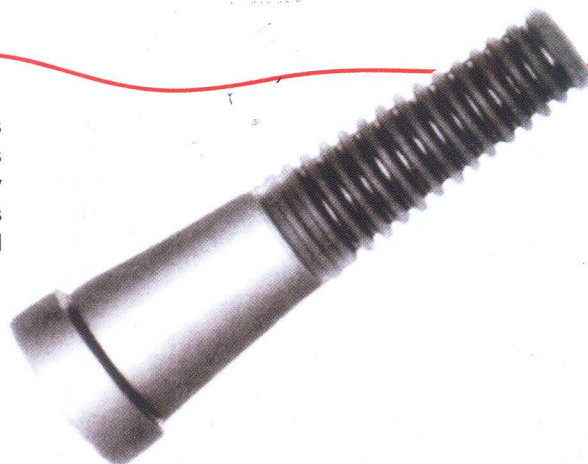

## DP-52

**DP-52** – a highly stable and durable finger for heavy-duty jobs and work in hard conditions. Especially fit for picking turkeys and large poultry. **DP-52** fits ASHLEY, BARKER, GORDON-JOHNSON equipment and also GAINESVILLE pickers. Available in all hardness degrees and in different colors.

## DANA

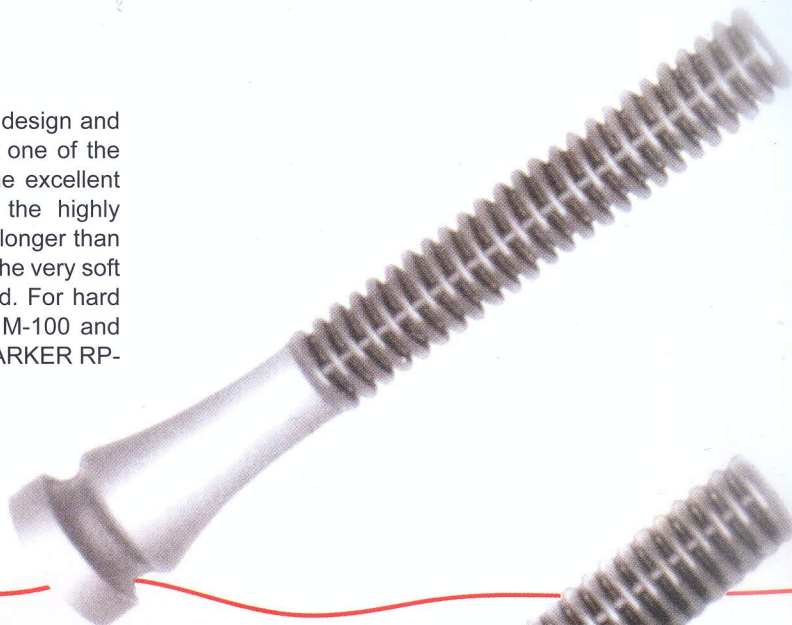

**DANA** – a round finger, one of many options Duram offers users of JOHNSON, GORDEX and locally made pickers in many countries. **DANA** is produced in sizes which may fit disc holes of different pickers. Fits the same pickers as **DUROTY** fingers: GORDON-JOHNSON, DURA 1 and DURA 2 defeatherators.

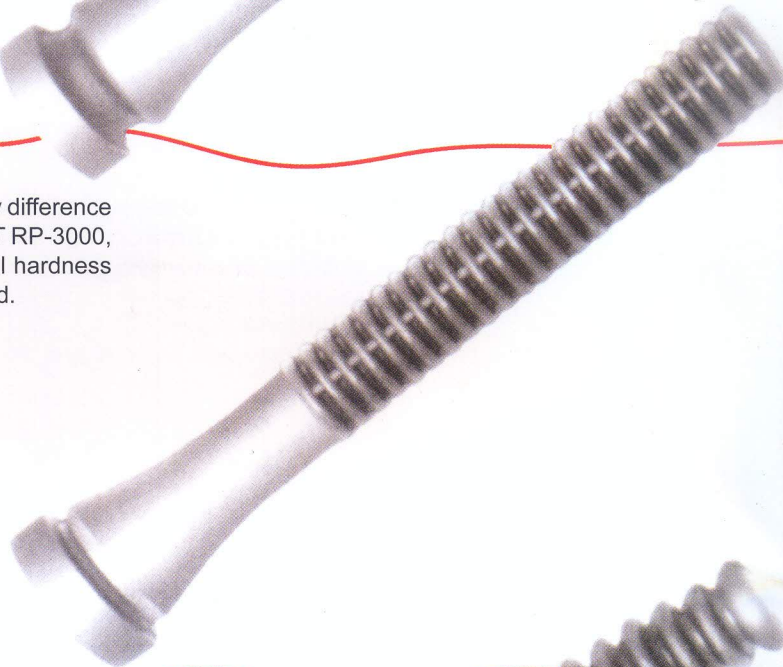

## DURAM 301

**DURAM 301** – the combination of its special design and the fine quality of Duram compound make it one of the best fingers now available in the market. The excellent picking qualities are shown when picking the highly marketable "yellow birds". **DURAM 301** lasts longer than any other finger type. For broiler and Cornish the very soft and flexible compound M-45 is recommended. For hard duty such as turkeys the compounds M-90, M-100 and M-110 are recommended. **DURAM 301** fits BARKER RP-3000 thick drums, BARKER RF-6 and more.

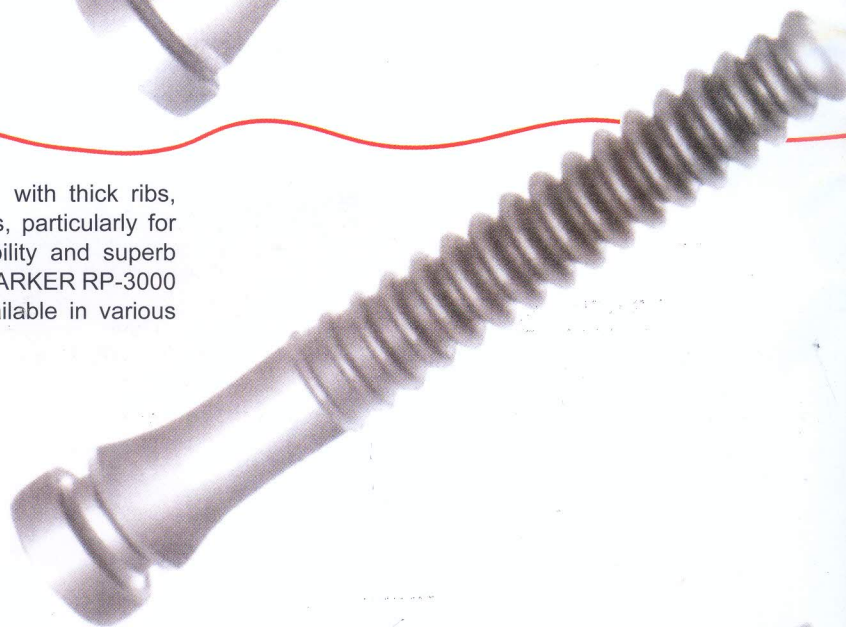

## DURAM 101

**DURAM 101** – similar to **DURAM 301**. The only difference is in the width of the finger's neck. Fits BARKER RP-3000, BARKER RF-6 with thin drums. Available in all hardness degrees and in colors as per customer demand.

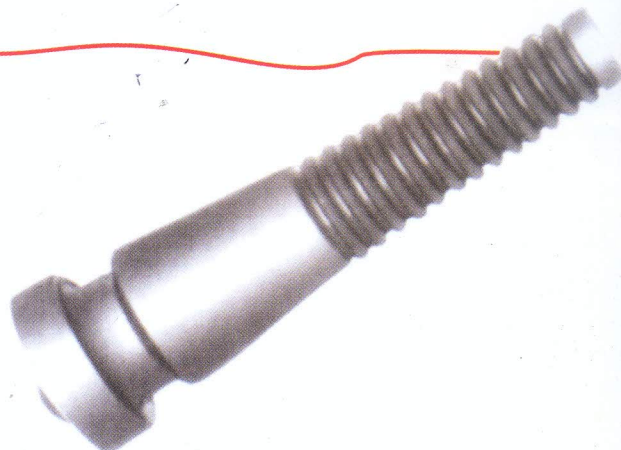

## DURAM 351

**DURAM 351** – a strong, round finger, with thick ribs, designed for difficult working conditions, particularly for picking turkeys. It has excellent durability and superb picking performance. **DURAM 351** fits BARKER RP-3000 and BARKER RF-6 drums, and is available in various hardness degrees and colors.

## DURAM 302

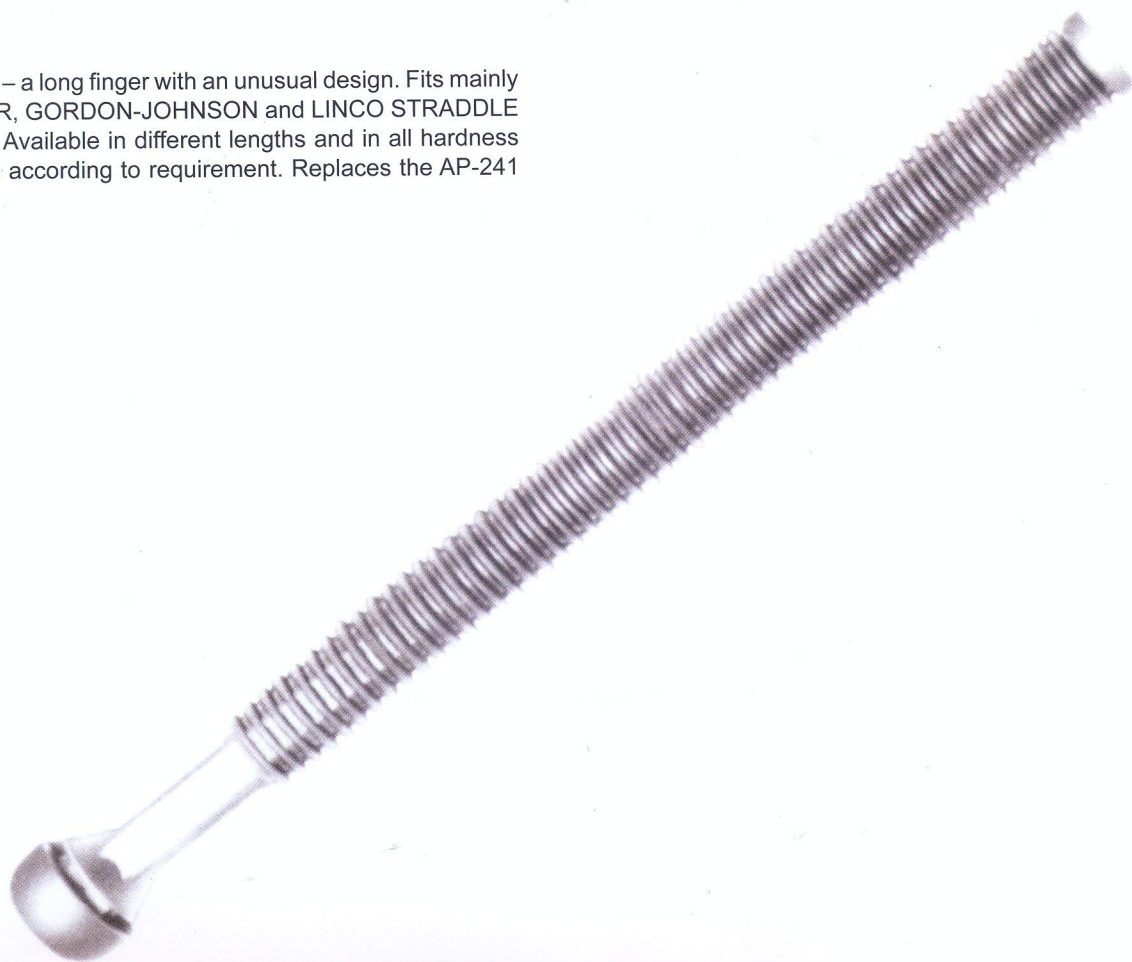

**DURAM 302** – a round finger with a very gentle touch, **DURAM 302** does an excellent job in cleaning the birds without causing any skin damage. Available in all hardness degrees and in different colors. Fits BARKER-FINFLEX and GENTLE FLEX pickers.

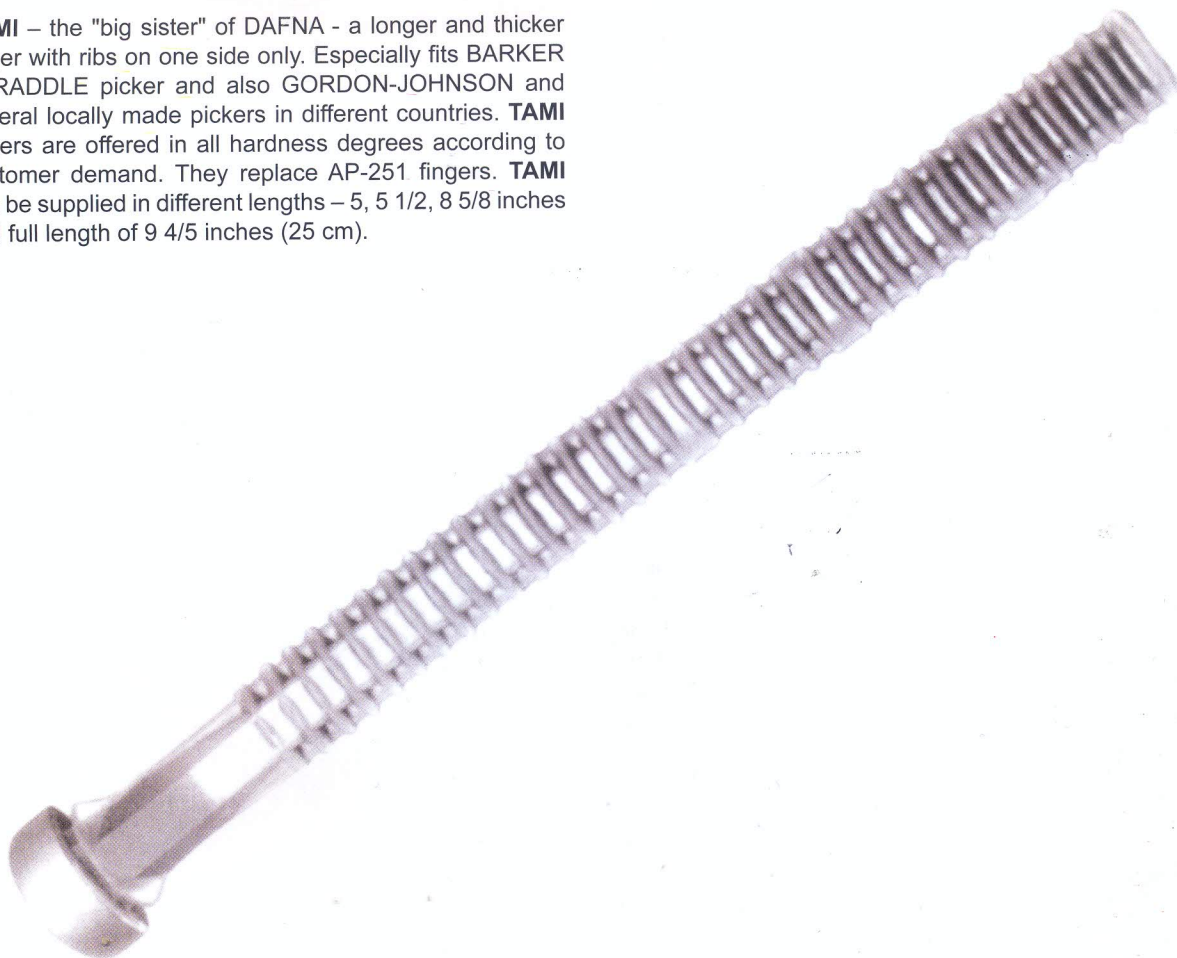

# DAFNA

**DAFNA** – a long finger with an unusual design. Fits mainly BARKER, GORDON-JOHNSON and LINCO STRADDLE pickers. Available in different lengths and in all hardness degrees according to requirement. Replaces the AP-241 finger.

**TAMI** – the "big sister" of DAFNA - a longer and thicker finger with ribs on one side only. Especially fits BARKER STRADDLE picker and also GORDON-JOHNSON and several locally made pickers in different countries. **TAMI** fingers are offered in all hardness degrees according to customer demand. They replace AP-251 fingers. **TAMI** can be supplied in different lengths – 5, 5 1/2, 8 5/8 inches and full length of 9 4/5 inches (25 cm).

# TAMI

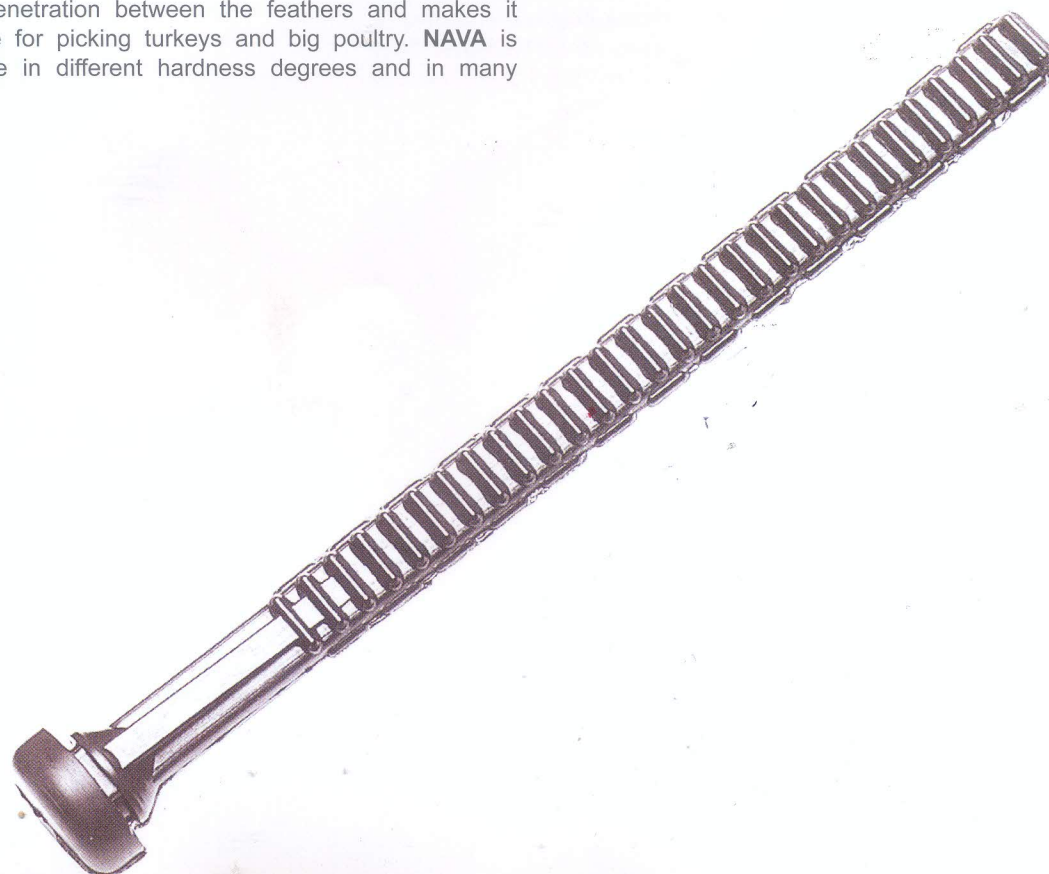

## RITA

**RITA** – a semi-round finger with strong, thick ribs on one side only. Its dimensions enable the use of **RITA** in all pickers where **GAINESVILLE** fingers are used. **RITA** is about 1 3/5 inches (4 cm) longer than **GAINESVILLE** and gives a good solution in Contramatic pickers where a long, flexible and strong finger is required.

## NAVA

**NAVA** – a flat long finger, with ribs on both sides, like **GAINESVILLE**. It has a very long body which enables good penetration between the feathers and makes it effective for picking turkeys and big poultry. **NAVA** is available in different hardness degrees and in many colors.

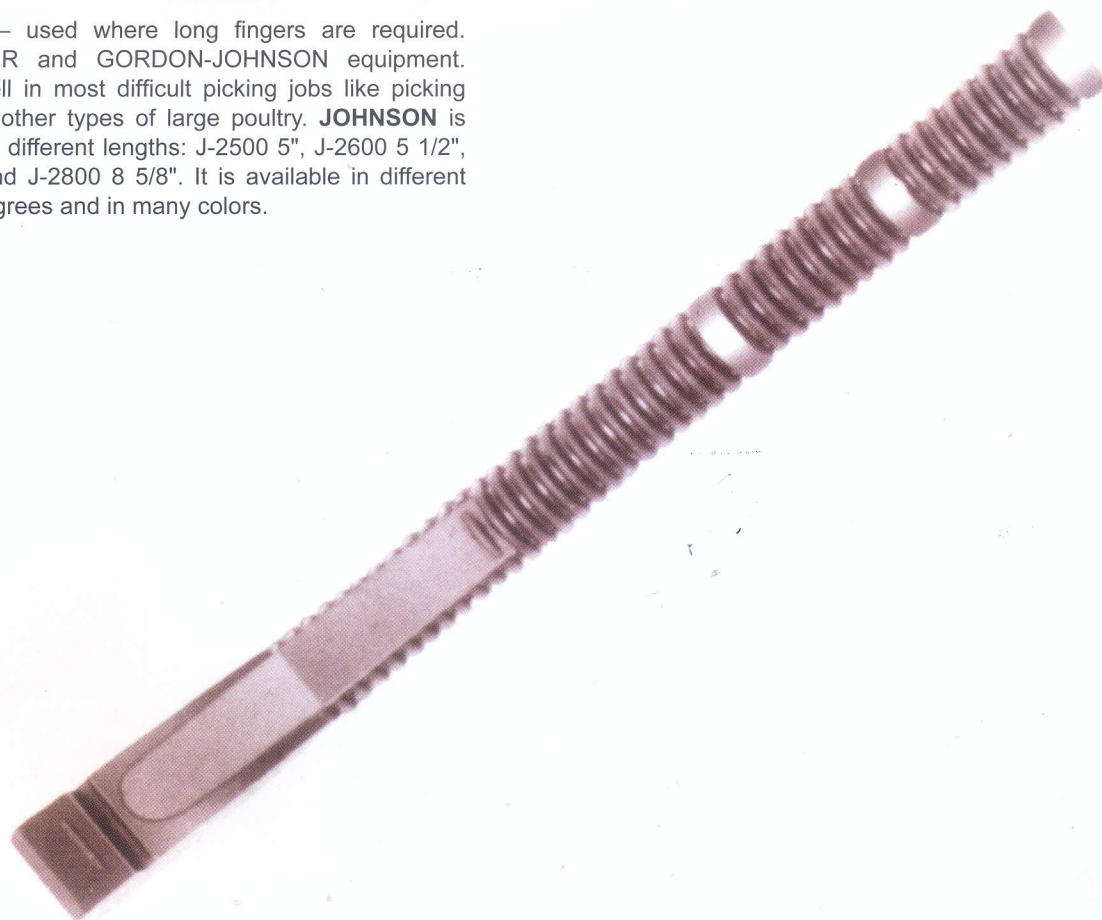

IRIS

**IRIS** – a round solid finger, 11 inches long (28 cm), fits BARKER STRADDLE picker. Available in several lengths according to customer needs. **IRIS** is available in different hardness degrees and in many colors.

**JOHNSON** – used where long fingers are required. Fits BARKER and GORDON-JOHNSON equipment. Performs well in most difficult picking jobs like picking turkeys and other types of large poultry. **JOHNSON** is supplied in 4 different lengths: J-2500 5", J-2600 5 1/2", J-2700 7" and J-2800 8 5/8". It is available in different hardness degrees and in many colors.

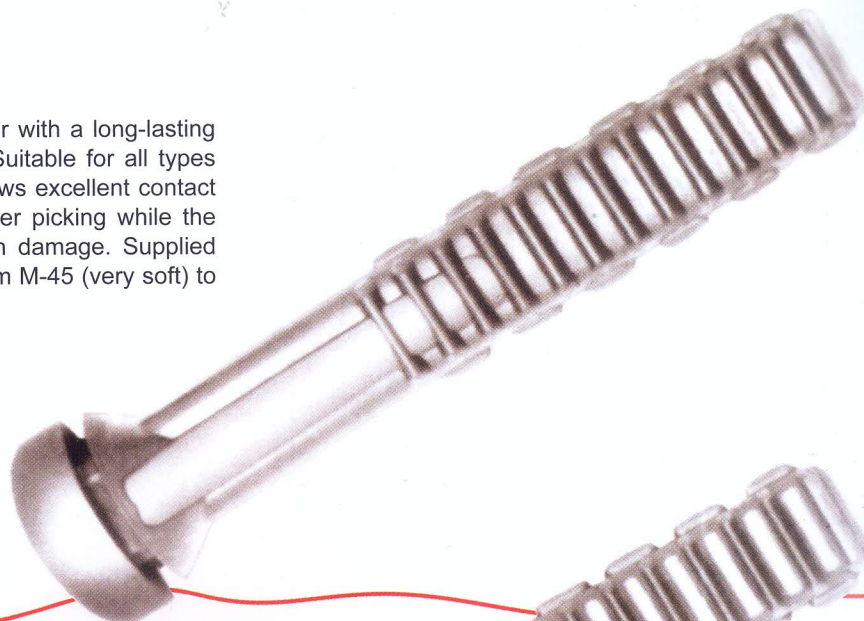

JOHNSON

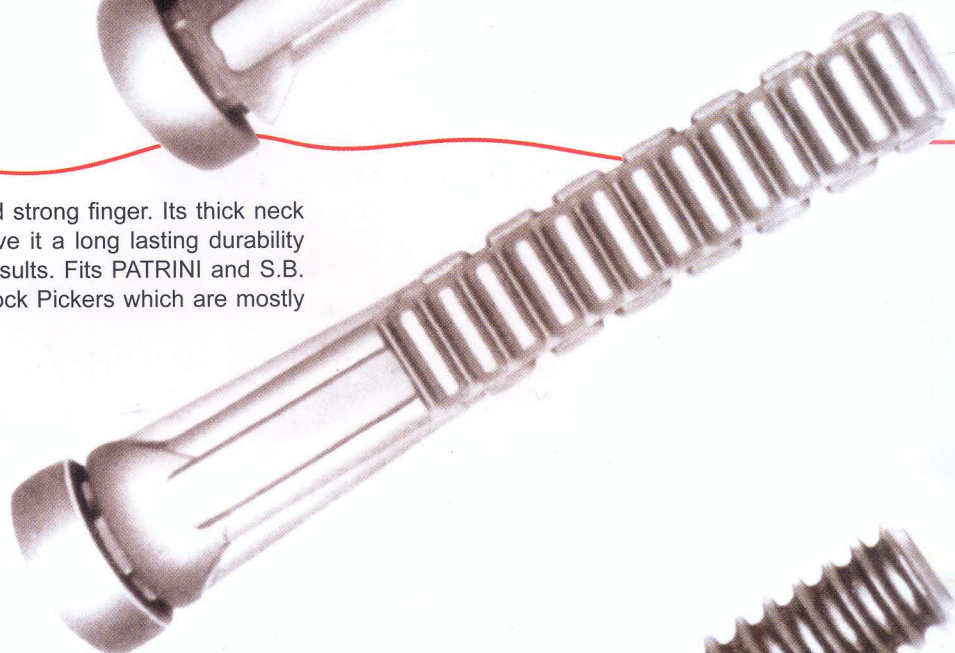

## GAINESVILLE

**GAINESVILLE** – a flat, strong finger with a long-lasting and efficient picking performance. Suitable for all types of Hock Pickers. The flat shape allows excellent contact with the bird's skin surface for closer picking while the flexibility of the finger prevents skin damage. Supplied in all hardness degrees, ranging from M-45 (very soft) to M-140 (very hard).

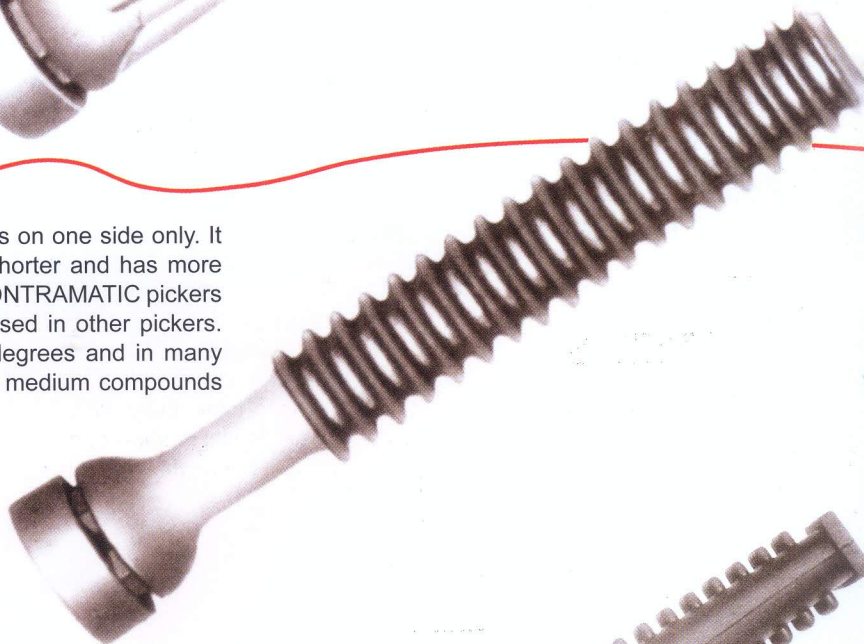

## BETTI

**BETTI** – a specially flat and strong finger. Its thick neck and special body-design give it a long lasting durability and ensure good picking results. Fits PATRINI and S.B. IMPIANTI machines and Hock Pickers which are mostly used for picking turkeys.

## GALI

**GALI** – a semi-round finger with ribs on one side only. It is similar in shape to RITA but is shorter and has more delicate ribs. **GALI** especially fits CONTRAMATIC pickers made by LINCO but can also be used in other pickers. **GALI** is available in all hardness degrees and in many colors. For picking chickens soft or medium compounds are recommended.

## NOGA

**NOGA** – a flat, strong finger of a special design. Used mainly in Drum pickers for all types of poultry. **NOGA** is available in different hardness degrees and in many colors.
